

Liquidity Ratios Disclosure

As at 30 September 2020

Executive Summary

The purpose of the disclosure is to enable market participants to compare the liquidity of banks across jurisdictions and to improve consistency and ease of use of disclosures relating to liquidity ratios.

In August 2018, the Central Bank of Bahrain issued its regulations on Liquidity Risk Management (Module LM). The module mandates that banks must adequately manage their assets and liabilities to create strong short-term resilience to be able to sufficiently meet the Bank's net cash outflows within 30 days (LCR), and promoting banks to rely on funding from stable sources and long-term borrowing in order to reduce the risks of disruptions which might impact the bank's liquidity position (NSFR).

The format and the level of disclosure in the attached report is dictated by the Central Bank of Bahrain (CBB) and reflects a proforma issued by the Central Bank.

Consolidated Liquidity Coverage Ratio as of 30 September 2020

In August 2018, the Central Bank of Bahrain issued it's regulations on Liquidity Risk Management (Module LM). The module mandates that banks must adequately manage their assets and liabilities to create strong short-term resilience and a sufficient ability to meet the bank's net cash outflows within 30 days.

As per CBB Module LM, banks are required to meet the minimum LCR of at least 100% on a daily basis. This ratio was relaxed to 80% for 2020 due to the pressures within the banking sector following the COVID pandemic, However, NBB Group still seeks to maintain the original higher 100% requirement. Below is National Bank of Bahrain's consolidated LCR disclosure as of 30 September 2020:

^{2.} Includes retail and SME deposits from the bank's overseas branches.

Consolidated Net Stable Funding Ratio as of 30 September 2020

In August 2018, the Central Bank of Bahrain issued it's regulations on Liquidity Risk Management (Module LM). The main objective of the NSFR is to promote the resilience of the banking system by improving the funding profile of banks by ensuring they have sufficient level of stable funding in relation to their assets and commitments. The NSFR thus promotes banks to rely on funding from stable sources and long-term borrowing in order to reduce the risks of disruptions which might impact the bank's liquidity position.

As per CBB Module LM, banks are required to meet the minimum NSFR of at least 100% on a continuous basis. This ratio was relaxed to 80% for 2020 due to the pressures within the banking sector following the COVID pandemic, However, NBB Group still seeks to maintain the original higher 100% requirement. Below is National Bank of Bahrain's consolidated NSFR disclosure as of 30 September 2020:
