# Independent auditors' report

**To the Shareholders of National Bank of Bahrain B.S.C.**P.O BOX 106, Manama
Kingdom of Bahrain

#### Opinion

We have audited the consolidated financial statements of National Bank of Bahrain B.S.C. (the "Bank") and its subsidiary (together the "Group"), which comprise the consolidated statement of financial position as at 31 December 2023, the consolidated statements of profit or loss, comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2023, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards).

#### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' responsibilities for the audit of the consolidated financial statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Kingdom of Bahrain, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

### Impairment of loans and advances

Refer to the use of estimate and management judgment in note 2(d), impairment policy in the note 2f(x), note 7 and disclosures of credit risk in note 3 of the consolidated financial statements

The key audit matter	How the matter was addressed in our audit
We focused on this area because:  of the significance of loans and advances representing 47% of total assets;	<ul> <li>Our audit procedures, amongst others, to address significant risks associated with impairment of loans and advances included Evaluating the appropriateness of the accounting policies adopted based on the requirements of IFRS 9, our business understanding, and industry practice.</li> </ul>

- impairment of loans and advances involves:
  - complex estimates and judgement over both timing and recognition of impairment including susceptibility to management bias;
  - o use of statistical models and methodologies for determination of expected credit losses. The Group exercises significant judgments and makes a number of assumptions in developing its ECL models which is determined as a function of the assessment of the probability of default ("PD"), loss given default ("LGD"), and exposure at default ("EAD") associated with the underlying financial assets; and
  - complex disclosure requirements regarding credit quality of the portfolio including explanation of key judgments and material inputs used in determination of expected credit losses;
- The need to measure ECLs on an unbiased forward-looking basis incorporating a range of economic conditions. Significant management judgment is applied in determining the economic scenarios used and the probability weighting applied to them; and
- Adjustments to the ECL model results are made by management to address known impairment model limitations or emerging trends or risks.

 Confirming our understanding of management's processes, systems and controls implemented, including controls over expected credit loss ("ECL") model development.

#### **Controls testing**

We performed process walkthroughs to identify the key systems, applications and controls used in the ECL processes. We tested the relevant General IT and application controls over key systems used in the ECL process. Key aspects of our control testing involved the following:

- Performing detailed credit risk assessment for a sample of performing and non-performing loans to test controls over credit rating and its monitoring process;
- Testing the design and operating effectiveness of the key controls over the completeness and accuracy of the key inputs and assumptions elements into the IFRS 9 ECL models;
- Testing controls over the transfer of data between underlying source systems and the ECL models that the Group operates;
- Testing controls over the modelling process, including governance over model monitoring, validation and approval;
- Testing key controls relating to selection and implementation of material economic variables; and
- Testing controls over the governance and assessment of model outputs and authorisation and review of post model adjustments and management overlays including selection of economic scenarios and the probability weights applied to them.

#### **Test of details**

Key aspects of our testing involved:

- Sample testing over key inputs and assumptions impacting ECL calculations including economic forecasts and weights to confirm the accuracy of information used;
- Re-performing key aspects of the Group's significant increase in credit risk ("SICR") determinations and selecting samples of financial instruments to determine whether a SICR was appropriately identified;
- Re-performing key elements of the Group's model calculations and assessing performance results for accuracy; and
- Selecting a sample of post model adjustments and management overlays in order to assess the reasonableness of the adjustments by challenging key assumptions, testing the underlying calculation and tracing a sample back to source data.

#### Use of specialists

For the relevant portfolios examined, we have involved KPMG specialists to assist us in assessing IT system controls and challenging key management assumptions used in determining expected credit losses. Key aspects of their involvement include:

- We involved our information technology specialists to test controls over the IT systems and recording of data in source systems;
- We involved our credit risk specialists in:
  - evaluating the appropriateness of the Groups' ECL methodologies (including the staging criteria used);
  - re-preforming the calculations of certain components of the ECL model (including the staging criteria);
  - evaluating the appropriateness of the Group's methodology for determining the economic scenarios used and the probability weighting applied to them; and
  - evaluating the overall reasonableness of the management economic forecast by comparing it to external market data and our understanding of the underlying sector and macroeconomic trends.

#### **Disclosures**

Evaluating the adequacy of the Group's disclosure in relation to use of significant estimates and judgment and credit quality of loans and advances by reference to the requirements of relevant accounting standards.

#### Other Information

The board of directors is responsible for the other information. The other information comprises the annual report but does not include the consolidated financial statements and our auditors' report thereon. Prior to the date of this auditors' report, we obtained the board of directors' report which forms part of the annual report, and the remaining sections of the annual report are expected to be made available to us after that date.

Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we have obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of Board of Directors for the Consolidated Financial Statements

The board of directors is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards, and for such internal control as the board of directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the board of directors is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the board of directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

#### Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the board of directors.
- Conclude on the appropriateness of the board of directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the board of directors with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the board of directors, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

#### **Report on Other Regulatory Requirements**

As required by the Commercial Companies Law and (Volume 1) of the Central Bank of Bahrain (CBB) Rule Book, we report that:
a) the Bank has maintained proper accounting records and the consolidated financial statements are in agreement therewith;
b) the financial information contained in the board of directors' report is consistent with the consolidated financial statements;
c) we are not aware of any violations during the year of the Commercial Companies Law, the CBB and Financial Institutions Law

No. 64 of 2006 (as amended), the CBB Rule Book (Volume 1), applicable provisions of Volume 6 and CBB directives), the CBB

c) we are not aware of any violations during the year of the Commercial Companies Law, the CBB and Financial Institutions Law No. 64 of 2006 (as amended), the CBB Rule Book (Volume 1), applicable provisions of Volume 6 and CBB directives), the CBB Capital Markets Regulations and associated resolutions, the Bahrain Bourse rules and procedures or the terms of the Bank's memorandum and articles of association that would have had a material adverse effect on the business of the Bank or on its financial position; and

d) satisfactory explanations and information have been provided to us by management in response to all our requests.

The engagement partner on the audit resulting in this independent auditors' report is Salman Manjlai.

The accompanying notes 1 to 48 are an integral part of these financial statements.

#### 1. REPORTING ENTITY

The National Bank of Bahrain B.S.C., a public shareholding company, was incorporated in the Kingdom of Bahrain by an Amiri decree in January 1957. The Bank is licensed by the Central Bank of Bahrain (CBB) as a conventional retail bank.

The overseas branches in United Arab Emirates and Kingdom of Saudi Arabia operate under the laws of those respective countries.

The Bank's registered address is National Bank of Bahrain B.S.C., P.O.Box 106, NBB Tower, Government Avenue, Manama, Kingdom of Bahrain. The shares of the Bank are listed on the Bahrain Bourse, Manama, Kingdom of Bahrain.

The consolidated financial statements include the results of the Bank and its subsidiary (together the Group). The Bank holds 78.8% of the share capital of Bahrain Islamic Bank B.S.C. (BISB) which operates under an Islamic retail banking license issued by the CBB. The Group is principally engaged in providing retail and wholesale commercial banking services, treasury and investment activities, and investment advisory services.

#### 2. MATERIAL ACCOUNTING POLICIES

#### a. Statement of compliance

The consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS), the requirements of the Commercial Companies Law and the Central Bank of Bahrain and Financial Institutions Law 2006.

#### b. Basis of preparation

The consolidated financial statements of the Group are presented in Bahraini Dinar (BHD) being the functional currency of the Group. The US Dollar (USD) amounts are presented for the convenience of the reader. The Bahraini Dinar has been translated to US Dollar at the rate of BHD 0.377 to USD 1 (2022: BHD 0.377 to USD 1).

The consolidated financial statements have been prepared on the historical cost convention except for financial instruments classified as fair value through profit or loss, fair value through other comprehensive income investments and derivative financial instruments which are measured at fair value. The principal accounting policies applied in the preparation of these financial statements have been consistently applied to all the years presented except as described below:

#### i) Adoption of new accounting policies and amendmends to standards

#### A. IFRS 17 - Insurance Contracts

IFRS 17 - Insurance Contracts (IFRS 17) is effective for reporting periods beginning on or after 1 January 2023. IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and reinsurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. Limited scope exceptions apply.

As part of this determination, the Group assessed credit cards and similar products that include insurance coverage. IFRS 17 excludes from its scope credit card contracts, and other similar contracts that provide credit or payment arrangements, that meet the definition of an insurance contract if the entity does not reflect an assessment of the insurance risk associated with an individual customer in setting the price of the contract with that customer.

The Group has determined that insurance risk associated with an individual customer has not been assessed in setting the price of the contracts as these products are offered at the same price to all applicants and are therefore exempt from IFRS 17.

The Group has not identified contracts that result in the transfer of significant insurance risk, and therefore it has concluded that IFRS 17 does not have a material impact on the consolidated financial statements for the year ended 31 December 2023.

### 2. MATERIAL ACCOUNTING POLICIES (continued)

#### d. Basis of preparation (continued)

#### i) Adoption of new accounting policies and amendmends to standards (continued)

# B. Disclosure of Accounting Policies – Amendments to IAS 1 and IFRS Practice Statement 2 The key amendments to IAS 1 include:

- requiring companies to disclose their material accounting policies rather than their significant accounting policies;
- clarifying that accounting policies related to immaterial transactions, other events or conditions are themselves immaterial and as such need not be disclosed; and
- clarifying that not all accounting policies that relate to material transactions, other events or conditions are themselves material to a company's financial statements.

The International Accounting Standards Board (IASB) also amended IFRS Practice Statement 2 to include guidance and two additional examples on the application of materiality to accounting policy disclosures.

The amendments are consistent with the refined definition of material: "accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements".

The amendments did not have any impact on the measurement, recognition or presentation of any items in the Group's consolidated financial statements.

#### C. Definition of Accounting Estimates – Amendments to IAS 8

The amendments introduce a new definition for accounting estimates: clarifying that they are monetary amounts in the financial statements that are subject to measurement uncertainty. The amendments also clarify the relationship between accounting policies and accounting estimates by specifying that a company develops an accounting estimate to achieve the objective set out by an accounting policy.

The amendment did not have any impact on the Group's consolidated financial statements.

## ii) New standards and amendments not yet effective

A number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2024 and earlier application is permitted; however, these standards are not relevant to the Group and were not early adopted in preparing these consolidated financial statements.

#### c. Foreign currencies

#### i) Foreign currency transactions:

Foreign currency transactions are initially recorded at rates of exchange prevailing at the value date of the transactions. Monetary assets and liabilities in foreign currencies are translated to respective functional currencies at the rates of exchange prevailing at the statement of financial position date. Realised and unrealised exchange gains or losses are recognised in the statement of profit or loss and included in other income.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated into the functional currency at the spot exchange rate at the date that the fair value was determined. Foreign currency differences arising on retranslation are recognised in the statement of profit or loss, except for differences arising on the retranslation of fair value through other comprehensive income equity instruments which are recognised directly in other comperhensive income as part of fair value changes.

#### ii) Foreign operations:

The assets and liabilities of the overseas branches are translated into Bahraini Dinar at the spot exchange rate at the reporting date. The income and expenses of these overseas branches for the year are translated into Bahraini Dinar at average exchange rates. Differences resulting from the translation of the opening net investment in these overseas branches are recognised in other comprehensive income.

### 2. MATERIAL ACCOUNTING POLICIES (continued)

#### d. Use of estimates and management judgement

The Group's financial statements and its financial results are influenced by accounting policies, assumptions, estimates and management judgement, which necessarily have to be made in the course of preparation of the financial statements.

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities. All estimates and assumptions required in conformity with IFRS are best estimates undertaken in accordance with the application of the standards. Estimates and judgements are evaluated on a continuous basis, and are based on past experience and other factors, including expectations with regard to future events.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure the fair value of the financal instruments.

The Group reviews its loan portfolios to assess impairment at least on a quarterly basis. In determining whether an impairment loss should be recorded in the statement of profit or loss.

The Group has an internal credit rating model that uses qualitative and quantitative factors that are indicative of risk of default. These factors vary depending on the nature of the exposure and the type of borrower. The credit grades are calibrated such that the risk of default increases at each higher risk grade. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. The Group also uses external credit ratings for certain exposures.

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and expert credit assessment and includes forward-looking information.

In determining whether credit risk has increased significantly since initial recognition the following criteria are considered:

- I. Downgrade in risk rating according to the approved ECL policy.
- II. Facilities restructured during the previous twelve months.
- III. Facilities overdue by 30 days as at the reporting date subject to rebuttal in applicable circumstances.

The Group makes judgements as to whether there is any observable data indicating an impairment trigger followed by measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on assets in the Group. Management uses estimates based on historical loss experience for assets within credit risk characteristics and objective evidence of impairment similar to those in the portfolio to assess impairment.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period or in the period of the revision and future period if the revision affects both current and future periods.

The Group reviews its goodwill and intangibles on an annual basis to determine whether an impairment loss should be recorded in the statement of profit or loss, where assumptions and judgements are made in computing the recoverable value. Further details on impairment of non-financial assets are included in note 2g.

### 2. MATERIAL ACCOUNTING POLICIES (continued)

#### e. Accounting for income and expenses

i) Interest income and expenses are recognised in the statement of profit or loss on an accrual basis using the effective interest rate method.

The effective interest rate method is a method of calculating the amortised cost of a financial asset or liability and of allocating the interest income or interest expense over the expected life of the asset or liability. The effective interest rate is the rate that exactly discounts estimated future cash flows through the expected life of the financial asset or liability or, where appropriate, a shorter period, to the net carrying amount of the financial asset or liability. The application of the effective interest rate method has the effect of recognising interest income and interest expense evenly in proportion to the amount outstanding over the period to maturity or repayment. In calculating the effective interest rate, cash flows are estimated taking into consideration all contractual terms of the financial instrument but excluding future credit losses.

- ii) Fees and commissions that are integral to the effective interest rate of a financial asset or liability are included in the calculation of the effective interest rate. Other fees and commissions are recognised as the related services are performed or received, and are included in fee and commission income.
- iii) Dividend income is recognised when the right to receive a dividend is established.
- iv) Short term employee benefit obligations are measured on an undiscounted basis and are expensed as the related services are provided. A provision is recognised for the amount expected to be paid under short-term cash bonus or profit sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

The Group has different retirement benefit schemes for its employees in Bahrain and its overseas branches, which are in accordance with the relevant labour laws of the respective countries. The retirement benefit scheme is in the nature of a 'Defined Contribution Plan' for employees who are covered by the social insurance pension schemes in Bahrain and the overseas branches. Other employees are entitled to leaving indemnities payable in accordance with the employment agreements or under the respective labour laws, based on length of service and final remuneration. This liability is unfunded and is provided for on the basis of the cost had all such employees left at the statement of financial position date. The cost of providing these retirement benefits is charged to the statement of profit or loss.

The Group has a voluntary employees saving scheme. The Group and the employees contribute monthly on a fixed percentage of salaries basis to the scheme. The scheme is managed and administered by a board of trustees who are the employees of the Group. The Group's share of contribution to this scheme is charged to the statement of profit or loss.

v) Other expenses are recognised in the period in which they are incurred on an accrual basis.

## 2. MATERIAL ACCOUNTING POLICIES (continued)

#### f. Financial assets and liabilities

#### i. Recognition and initial measurement

The Group initially recognises financial assets and liabilities on the date on which they are originated. A financial asset or financial liability is measured initially at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue.

#### ii. Classification

On initial recognition, a financial asset is classified as measured at: amortised cost, FVOCI or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- The asset is held within a business model whose objective is to hold assets to collect contractual cash flows: and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI).

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- The asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI).

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in fair value in other comprehensive income. This election is made on an investment-by-investment basis.

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

#### **Business model assessment**

The Group makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining practical interest rate profile, realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Group's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed; and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Group's stated objective for managing the financial assets is achieved and how cash flows are realised.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

### 2. MATERIAL ACCOUNTING POLICIES (continued)

#### f. Financial assets and liabilities (continued)

#### Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, principal is defined as the fair value of the financial asset on initial recognition. Interest is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Group considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Group's claim to cash flows from specified assets (e.g. non-recourse asset arrangements); and
- features that modify consideration of the time value of money e.g. periodical reset of interest rates.

The Group holds a portfolio of long-term fixed-rate loans for which the Group has the option to propose to revise the interest rate at periodic reset dates. There reset rights are limited to the market rate at the time of revision. The borrowers have an option to either accept the revised rate or redeem the loan at par without penalty. The Group has determined that the contractual cash flows of these loans are SPPI because the option varies the interest rate in a way that is consideration for the time value of money, credit risk, other basic lending risks and costs associated with the principal amount outstanding.

The Group classifies its financial liabilities, other than financial guarantees, as measured at amortised cost.

#### iii. Reclassifications

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Group changes its business model for managing financial assets.

## iv. Customer deposits

Customer deposits are initially recognised at their fair value and subsequently measured at their amortised cost using the effective interest rate method.

### v. Financial guarantees

Financial guarantees are contracts that require the Group to make specified payments to reimburse the holder for a loss it incurs because a specific debtor fails to make payment when due in accordance with the contractual terms.

Financial guarantees are initially recognised at fair value (which is the premium received on issuance). The premium received is amortised over the life of the financial guarantee. The guarantee liability (the notional amount) is subsequently carried at the higher of this amortised amount and the present value of any expected payment (when a payment under the guarantee has become probable). The unamortised portion of the premium on these financial guarantees is included under other liabilities.

#### 2. MATERIAL ACCOUNTING POLICIES (continued)

#### f. Financial assets and liabilities (continued)

#### vi. Derivative financial instruments

All derivative financial instruments are initially recognised at cost, being the fair value at contract date, and are subsequently re-measured at their fair values. Fair values are obtained from quoted market prices in active markets including recent market transactions, and valuation techniques including discounted cash flow models and option pricing models as appropriate. Changes in the fair value of derivative financial instruments that do not qualify for hedge accounting are recognised in same statement of profit or loss line as the underlying item. In the case of fair value hedges that meet the criteria for hedge accounting, any gain or loss arising from remeasuring the hedging instruments to fair value as well as the related changes in fair value of the item being hedged are recognised in the statement of profit or loss under other income.

The Group designated certain derivatives as hedging instruments to hedge variability in fair values associated with interest rates.

In the case of cash flow hedges that meet the criteria of hedge accounting, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised directly in equity and the ineffective portion, if any, is recognised in the statement of profit or loss.

All derivative financial instruments are recognised in the statement of financial position as either assets (positive fair values) or liabilities (negative fair values).

#### vii. Repos and reverse repos

Where securities are sold subject to a commitment to repurchase them at a specified future date (repo) and at a predetermined price, they are not derecognised and the consideration received is classified as borrowings under repurchase agreements. The difference between the sale and repurchase price is treated as an interest expense and accrued over the life of the repo agreement using the effective yield method. Conversely, securities purchased under a commitment to resell them at a specified future date (reverse repo) and at a predetermined price are not recognised on the statement of financial position and the consideration paid is recorded in placements with banks and other financial institutions. The difference between the purchase and resale price is treated as an interest income and accrued over the life of the reverse repo agreement using the effective interest rate method.

#### viii. Cash and cash equivalents

Cash and cash equivalents comprise cash, balances at central banks excluding mandatory cash reserves, placements with banks and other financial institutions that mature within three months of the date of placement, and short-term highly liquid investments that are readily convertible to cash and which are subject to an insignificant risk of change in value and mature within three months of the date of acquisition and are used by the Group in the management of its short term commitments.

#### ix. Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, or in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the Group measures the fair value of a financial instrument using quoted market prices in an active market for that instrument. This includes listed equity and debt securities. A market is regarded as active if quoted prices are readily and regularly available and represent actual and regularly occurring market transactions on an arm's length basis.

For unlisted debt securities the fair value is based on brokers quotes, recent arm's length transactions between knowledgeable, willing parties (if available) and discounted cash flow analyses with accepted economic methodologies for pricing financial instruments. For unlisted equity securities, the net asset value of the underlying entities is representative of the fair value given the nature of their balance sheet.

#### 2. MATERIAL ACCOUNTING POLICIES (continued)

#### f. Financial assets and liabilities (continued)

#### x. Identification and measurement of impairment

The Group recognises loss allowances for ECL on the following financial instruments that are not measured at FVTPL:

- Financial assets including loans and advances, debt instruments and placements;
- Financial guarantee contracts issued; and
- Loan commitments issued.

No impairment loss is recognised on equity investments.

The Group measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- debt investment securities that are determined to have low credit risk at the reporting date; and
- other financial instruments on which credit risk has not increased significantly since their initial recognition.

#### xi. Derecognition of financial assets and liabilities

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The rights to receive cash flows from the asset have expired; or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset; or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

If the terms of the financial assets are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognised. If the cash flows of the renegotiated asset are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised and the new financial asset is recognised at fair value. The impairment loss before an expected restructuring is measured as follows:

- If the expected restructuring will not result in derecognition of an existing asset, then the estimated cash flows arising from the modified financial asset are included in the measurement of the existing asset based on their expected timing and amounts discounted at the original effective interest rate of the existing financial asset.
- If the expected restructuring will result in derecognition of the existing asset, then the expected fair value
  of the new asset is treated as the final cash flow from the existing financial asset at the time of
  derecognition. This amount is discounted from the expected date of derecognition to the reporting date
  using the original effective interest rate of the existing financial asset.

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

#### g. Impairment of non-financial assets

At each statement of financial position date, the Group reviews the carrying amounts of its non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the assets is estimated in order to determine the extent of the impairment loss, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

### 2. MATERIAL ACCOUNTING POLICIES (continued)

#### g. Impairment of non-financial assets (continued)

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount.

An impairment loss is recognised in the statement of profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease. Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, such that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised in the statement of profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

#### h. Investment in associates

Associates are those entities in which the Group has significant influence, but not control or joint control, over their financial and operating policies. Significant influence is presumed to exist when the Group holds between 20 and 50 percent of the voting power of another entity. Associates are accounted for using the equity method and are recognised initially at cost, which includes the transaction costs. The financial statements of the Group include its share of the income and expenses and equity movements of associates, after adjustments to align the accounting policies with those of the Group, from the date that significant influence commences until the date that significant influence ceases. On cessation of significant influence, even if an investment in an associate becomes an investment in a joint venture, the entity does not re-measure the retained interest. When the Group's share of losses exceeds its interest in an associate, the carrying amount of that interest is reduced to nil and the recognition of further losses is discontinued except to the extent that the Group has an obligation or has made payments on behalf of the associate.

#### i. Leases

At the inception of the contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for the period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- the contract involves the use of an identified asset, this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified;
- the Group has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Group has the right to direct the use of the asset. The Group has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Group has the right to direct the use of the asset if either:
  - the Group has the right to operate the asset; or
  - the Group designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on reassessment of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Group has elected not to separate non-lease components and to account for the lease and non-lease components as a single lease component.

### 2. MATERIAL ACCOUNTING POLICIES (continued)

#### i. Leases (continued)

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises:

- the amount of the initial measurement of the lease liability;
- any lease payment made at or before the commencement date, less any lease incentives received;
- any initial direct cost incurred by the lessee; and
- estimated cost to dismantle and to remove the underlying asset, or to restore the underlying asset or the site on which it is located.

The right-of-use asset is subsequently depreciated using the straight line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined based on the lease term.

Lease liability is measured as the present value of the future lease payments that are not paid at the commencement date. The lease payments are discounted based on the Group's incremental borrowing rate. Lease liability comprises the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date:
- amounts expected to be payable under residual value guarantees;
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option;
- lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option; and
- penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

#### Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and for leases of low-value assets. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

#### 2. MATERIAL ACCOUNTING POLICIES (continued)

#### j. Property and equipment

Property and equipment are initially recorded at cost and subsequently stated at cost less accumulated depreciation and impairment losses. Land is not depreciated and is stated at cost at the date of acquisition. Where an item of property and equipment comprises major components having different useful lives, they are accounted for separately. The cost of an item of property and equipment comprises its purchase price and any costs directly attributable to bringing the asset to the location and condition necessary for it to be put to its intended use. Depreciation is charged to the statement of profit or loss on a straight-line basis over the estimated useful lives of the property and equipment. The estimated useful lives are as follows:

Buildings 20 to 40 years Furniture and equipment 3 to 15 years

The residual value and the useful life of property and equipment are reviewed periodically and, if expectations differ from previous estimates, the change is recognised prospectively in the statement of profit or loss over the remaining estimated useful life of the property and equipment.

#### k. Goodwill and intangibles

The Group accounts for business combinations using the acquisition method when control is transferred to the Bank. The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Transaction costs are expensed as incurred.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, and the amount recognised for non-controlling interests and any previous interest held over the net identifiable tangible and intangible assets acquired and liabilities assumed.

After initial recognition, goodwill and other intangibles are measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units. Further details on impairment of non-financial assets is included in note 2g.

Where goodwill has been allocated to a cash-generating unit ("CGU") and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained. Intangibles with indefinite useful lives are subject to impairment testing at least on an annual basis, while those with definite useful lives are amortised.

#### I. Other provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

#### m. Off-setting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group currently has a legally enforceable right to set-off the recognised amounts and the Group intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRS, or for gains and losses arising from a group of similar transactions such as in the Group's trading activity.

### 2. MATERIAL ACCOUNTING POLICIES (continued)

#### n. Settlement date accounting

All "regular way" purchases and sales of financial assets except for derivatives and assets classified as fair value through profit or loss are recognised on the settlement date i.e. the date the Group receives or delivers the asset. Regular way purchases and sales are those that require delivery of assets within the time frame generally established by regulation or convention in the market place. Derivative and assets classified as fair value through profit or loss transactions are recognised on trade date, representing the date the Group contracts to purchase or sell.

#### o. Proposed appropriations

Dividends and other proposed appropriations are recognised as a liability in the period in which they are approved by the shareholders.

#### p. Remuneration policy

Board of Directors - The remuneration of the Board of Directors is approved by the shareholders. In addition, directors are paid nominal fees for attending meetings of the sub-committees of the Board.

Employees - The remuneration primarily consists of monthly salaries and allowances. The Group also has a discretionary bonus scheme based on the net income for the year and considering the employees' performance during the year.

The above is in compliance with the sound remuneration practices regulation of the Central Bank of Bahrain.

#### q. Segment reporting

An operating segment is a component of the Group that engages in business activities from which it may earn revenue and incur expenses, including revenues and expenses that relate to transactions with any of the other components of the Group. All operating results of the operating segments are reviewed regularly by the Chief Executive Officer to make decisions about resource allocation and assess its performance, and for which discrete financial information is available.

### r. Earnings per share

The Group presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Group by the weighted average number of ordinary shares outstanding during the year. Diluted earnings per share is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

#### s. Income tax liability

The Group's operations in Bahrain and United Arab Emirates are not liable to income tax. The Group's Saudi Arabia branch is subject to income tax in accordance with the Saudi Income Tax Law. Income tax, if any, is charged to the statement of profit or loss.

## t. Repossessed property

In certain circumstances, property is repossessed following the foreclosure on loans and advances that are in default. Repossessed properties are measured at the lower of their carrying amount and their fair value less costs to sell and are reported within other assets.

#### u. Investment property

Properties held for rental or capital appreciation purposes are classified as investment properties. Investment properties are initially recorded at cost, being the fair value of the consideration given and acquisition charge. Subsequently, investment properties are measured at fair value and movements are recorded under other income in the statement of profit or loss.

#### v. Assets under management

The Group acts as a trustee / manager and in other capacities that result in holding or placing of assets on behalf of a trust or other institution. These assets and income arising thereon are not included in the Group's financial statements as they are not assets of the Group.

#### 3. FINANCIAL RISK MANAGEMENT

The Group is exposed to the following types of risks:

- credit risk
- liquidity risk
- market risk
- operational risk

#### Risk management framework

The overall authority for risk management in the Group is vested with the Board of Directors. The Board authorises appropriate credit, liquidity, market, and operational risk policies based on the recommendation of the Board Risk Committee and Management of the Group. The Group has established various committees that review and assess all risk issues. Approval authorities are delegated to different functionaries in the hierarchy depending on the amount, type of risk and nature of operations or risk. The Risk division of the Group provides the necessary support to Senior Management and the business units in all areas of risk management. The Risk division functions independent of the business units and reports directly to the Board Risk Committee and administratively to the Chief Executive Officer.

The Board Risk Committee is responsible for identifying and monitoring risks within the framework of the risk appetite established by the Board of Directors including reviewing and reporting its conclusions and recommendations to the Board on the Group's current and future risk appetite, the Group's risk management framework as well as the Group's risk culture.

The Group's risk management policies are established to identify and analyse the risk faced by the Group, to set appropriate limits and controls, and to monitor risk and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

#### Credit risk

Credit risk represents the potential financial loss as a consequence of a customer's inability to honour the terms and conditions of a credit facility. Such risk is measured with respect to counterparties for both onbalance sheet assets and off-balance sheet items.

The Group has well laid out procedures, not only to appraise but also to regularly monitor credit risk. Credit appraisal is based on the financial position of the borrower, performance projections, market position, industry outlook, external ratings (where available), track record, account conduct, repayment sources and ability, tangible and intangible security, etc. Regular reviews are carried out for each account and risks identified are mitigated in a number of ways, which include obtention of collateral, counter-guarantees from shareholders and/or third parties.

The Credit Risk Department of the Group independently analyses risks and puts forth its recommendations prior to approval by the appropriate authorities for facilities falling outside pre-approved product criteria. In addition to rigorous credit analysis, the terms and conditions of all credit facilities are strictly implemented by the Credit Administration Department. An internal grading system and annual review process supports the identification of any deterioration in credit risk and consequent implementation of corrective action.

The Group uses an internal risk rating system that has 10 risk rating grades with "+" or "-" modifiers resulting in a 22-point scale. The system takes into account the financial strength of a borrower as well as qualitative aspects to arrive at a comprehensive snapshot of the risk of default associated with the borrower. Risk ratings assigned to each borrower are reviewed at least on an annual basis. The internal risk rating grades range from 1 (highest quality with minimal credit risk) to 10 (lowest quality, typically in default with little prospect for recovery of principal or interest). For categories from 2 to 7, the Group uses modifiers '+' or '-' to show relative standing within these major rating categories. Regular monitoring of the portfolio enables the Group to identify accounts, which witness deterioration in risk profile. Retail credit facilities which are granted based on pre-defined criteria such as salary assignment, maximum repayment obligation as a percentage of salary etc., are excluded from this rating system.

The Group also uses the ratings by established rating agencies as part of the appraisal process while considering exposures to rated entities.

### 3. FINANCIAL RISK MANAGEMENT (continued)

#### Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk management ensures that funds are available at all times to meet the funding requirements of the Group.

The asset and liability management policies of the Group define the proportion of liquid assets to total assets with the aim of minimising liquidity risk. The Group maintains adequate liquid assets such as interbank placements, treasury bills and other readily marketable securities, to support its business and operations. The Treasury Department monitors the maturity profile of assets and liabilities so that adequate liquidity is maintained at all times. The Group Asset Liability Committee (GALCO) chaired by the Chief Executive Officer reviews the liquidity gap profile and the liquidity scenario and addresses strategic issues concerning liquidity.

#### Market risk

Market risk is the risk of potential losses arising from movements in market prices of interest rate related instruments and equities in the trading portfolio and foreign exchange and commodities holdings throughout the Group. The Group's trading activities are governed by policies that are clearly documented, by adherence to comprehensive limit structures set annually and by regular reviews. Quality and rating are the main criteria in selecting a trading asset. The Group uses the standardised method under Basel III for allocating market risk capital based on the risk assessed for underlying factors of interest rate risk, equity risk, foreign exchange risk, options risk and commodity risk.

#### Operational risk

Operational risk is the risk of monetary loss on account of human error, fraud, system failures or the failure to record transactions. The Group has well laid out procedures and systems that set out the methodologies for carrying out specific tasks. These systems and procedures are constantly reviewed and revised to address any potential risks. Additionally, new products and services are reviewed and assessed for operational risks prior to their implementation.

#### Capital management

The Group's policy is to maintain sufficient capital to sustain investor, creditor and market confidence and to support future development of the business. The impact of the level of capital on the return on shareholder's equity is also recognised, and the Group recognises the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position.

Less: provision for impairment	(97.9)	(259.7)	(95.2)	(252.5)	
	2,535.1	6,724.4	2,494.9	6,617.8	

**b)** As at 31 December 2023, the amount of floating rate loans for which interest was being reset by the Group on agreed dates and based on an agreed fixed margin over a benchmark interest rate amounted to BHD 802.7 million (USD 2,129.2 million) [31 December 2022: BHD 718.9 million (USD 1,906.9 million)].

#### 7 LOANS AND ADVANCES (continued)

c) In accordance with the Group's policy and the Central Bank of Bahrain guidelines, loans on which payments of interest or repayments of principal are 90 days past due, are immediately defined as non-performing. Any interest accrued is reversed and future interest is only recognised on a cash basis. The ageing schedule of non-performing loans and advances based on the time period since the last repayment of principal or interest by the customer, is as follows:

As at 31 December	202	2022		
	BHD millions	<b>USD</b> millions	BHD millions	USD millions
Up to 1 year	96.8	256.8	82.9	219.9
1 to 3 years	19.9	52.8	10.6	28.1
Over 3 years	6.8	18.0	6.1	16.2
Total	123.5	327.6	99.6	264.2
Fair market value of collateral	109.8	291.2	82.8	219.6
Stage 3 provisions	60.3	159.9	50.4	133.7

Loans that have been classified as non-performing should remain classified as such until the completion of a cooling off period in accordance with the Central Bank of Bahrain guidelines.

Loans that are past due below 90 days but not impaired are those for which contractual interest or principal payments are past due but the Group believes that specific impairment is not appropriate on the basis of the level of security or collateral available and / or the stage of collection of amounts owed to the Group. As at 31 December 2023, loans past due below 90 days but not impaired amounted to BHD 91.0 million (USD 241.4 million) [31 December 2022: BHD 83.5 million (USD 221.5 million)].

d) The contractual terms of a loan may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer. An existing loan whose terms have been substantially modified may be de-recognised and the renegotiated loan recognised as a new loan.

The Group renegotiates loans to customers as a result of financial difficulties (referred to as 'forbearance activities') or changes in anticipated cash flows to maximise collection opportunities and minimise the risk of default. During 2023, credit facilities amounting to BHD 30.5 million (USD 80.9 million) were restructured [2022: BHD 87.6 million (USD 232.4 million)]. Restructuring concessions mainly related to deferral of loan installments to assist customers overcome temporary cash flow situations or to realign the repayment with the borrower's revised cash flow projections, and amending the terms of loan covenants. Due to the minor nature of concessions, there was no significant impact on the Group's impairment charge or the future earnings. Loans that have been restructured are reported as stage 2 and should remain as such until the compeletion of a cooling off period in accordance with the Central Bank of Bahrain guidelines.

e) The Group holds collateral against loans and advances to customers in the form of lien over deposits, mortgage over properties and /or shares and sovereign / bank guarantees. Some of these collaterals are held through a special purpose vehicle. As at 31 December 2023, loans and advances amounting to BHD 684.5 million (USD 1,815.6 million) [31 December 2022: BHD 638.3 million (USD 1,693.1 million)] were fully collateralised and loans and advances amounting to BHD 285.1 million (USD 756.2 million) [31 December 2022: BHD 289.5 million (USD 767.9 million)] were partly collateralised with a collateral value of BHD 184.9 million (USD 490.5 million) [31 December 2022: BHD 194.6 million (USD 516.2 million)]. Therefore, fully or partially collateralised loans represented 36.9% of gross loans (31 December 2022: 35.8%).

As at 31 December 2023, all debt instruments were classified as stage 1.

### iv. Investments designated as fair value through profit or loss

The Group holds investment in managed funds designated as fair value through profit or loss amounting to BHD 3.6 million (USD 9.5 million) [2022: BHD 3.9 million (USD 10.3 million)].

#### 9 INVESTMENT IN ASSOCIATES

The Group has a 39.7% (2022: 39.7%) interest in The Benefit Company B.S.C. (c) which is incorporated in the Kingdom of Bahrain. The Benefit Company has been granted a license for ancillary services by the Central Bank of Bahrain to provide payment systems, Bahrain cheque truncation and other related financial services for the benefit of commercial banks and their customers in the Kingdom of Bahrain.

The Group has a 36.8% (2022: 36.8%) interest in LS Real Estate Company W.L.L. which was incorporated in the Kingdom of Bahrain in 2019. The company focuses on real estate activities including the development and overall management of owned or leased properties.

The Group has a 25.0% (2022: 25.0%) interest in Liquidity Management Centre B.S.C. (c) which was incorporated in 2002 as a bank, licensed and regulated by the Central Bank of Bahrain to facilitate the creation of an Islamic inter-bank market that allow Islamic financial services institutions to effectively manage their assets and liabilities.

The Group has a 23.5% (2022: 24.3%) interest in the units issued by the Bahrain Liquidity Fund (BLF). BLF was set up in 2016 as an open ended fund registered as Private Investment Undertaking "PIU" as per Central Bank of Bahrain rulebook volume 7. The main objective of BLF is to add liquidity to Bahrain Bourse, which over a period of time should result in enhancing investor confidence in the market's listed securities.

#### 10 INTEREST RECEIVABLE AND OTHER ASSETS

As at 31 December	2023		2022	
	BHD millions	<b>USD</b> millions	BHD millions	USD millions
Positive fair value of derivatives	50.5	134.0	22.0	58.4
Interest receivable	49.3	130.7	40.5	107.4
Accounts receivable and prepayments	7.4	19.6	8.3	22.0
Others	20.4	54.1	32.5	86.2
	127.6	338.4	103.3	274.0

Others included BHD 0.2 million (USD 0.4 million) [31 December 2022: BHD 6.9 million (USD 18.3 million)] relating to properties acquired from customers and now held for disposal, and BHD 18.5 million (USD 49.1 million) [31 December 2022: BHD 13.7 (USD 36.3 million)] of investment properties. The repossessed properties are stated at lower of their carrying value and fair value less costs to sell, while the investment properties are accounted for at fair value. BHD 4.9 million (USD 13.0 million) of investment properties reported at 31 December 2023 were previously categorised as repossessed assets.

#### 11 PROPERTY AND EQUIPMENT

	Leased property right-of-use	Land	Buildings	Furniture and equipment	Total	
	BHD millions	BHD millions	BHD millions	BHD millions	BHD millions	USD millions
Cost	6.7	8.0	42.6	85.8	143.1	379.6
Accumulated depreciation / amortisation	(3.7)	<u> </u>	(28.3)	(40.8)	(72.8)	(193.1)
Net book value at 31 December 2023	3.0	8.0	14.3	45.0	70.3	186.5
Net book value at 31 December 2022	2.9	8.0	13.6	45.6	70.1	185.9

The depreciation charge for 2023 amounted to BHD 8.9 million (USD 23.6 million) [2022: BHD 7.1 million (USD 18.8 million)]. The above includes capital work in progress at cost, amounting to BHD 16.5 million (USD 43.7 million) [2022: BHD 23.5 million) (USD 62.3 million)].

The amortisation related to the right-of-use of leased property in 2023 amounted to BHD 1.9 million (USD 5.1 million) [2022: BHD 2.1 million (USD 5.6 million)].

#### 12 GOODWILL AND OTHER INTANGIBLE ASSETS

On 22 January 2020, the Bank's stake in BISB increased from 29.1% as reported at 31 December 2019 to 78.8%, resulting in a transition from an investment in associate to an investment in a subsidiary, with the acquisition being accounted for using the acquisition method. The acquisition enabled the Group to position itself at the forefront of the regional Shariah-compliant banking sector in addition to its current leading conventional role. The two brands will continue to operate independently but asset, revenue, cost, technology and other operational synergies will provide customers and shareholders with enhanced services and returns.

Goodwill of BHD 41.8 million (USD 110.9 million) and intangibles of BHD 12.6 million (USD 33.4 million) arose from the acquisition of BISB. The intangibles comprises the value assigned to the expected benefits arising from the Islamic banking license and BISB brand being the oldest and predominant Islamic bank in the Kingdom of Bahrain. BHD 5.0 million (USD 13.3 million) of the intangibles were assigned a useful life of six years, with a remaining unamortised balance of BHD 2.5 million (USD 6.6 million) as of 31 December 2023 [31 December 2022: BHD 3.4 million (USD 9.0 million)].

#### Goodwill impairment analysis

The recoverable amount of goodwill is based on value-in-use, calculated by discounting cash flow projections from Board approved financial forecasts, projected for five years to arrive at the terminal value. A growth rate of 2% (2022: 2%) and discount rate of 15% (2022: 15%) have been applied to the estimated cash flows.

The Bank assesses on an annual basis whether there is an indication, based on either internal or external sources of information, that goodwill may be impaired. As at 31 December 2023, there were no indications of impairment of the cash generating unit (CGU) associated with the goodwill (2022: nil).

A sensitivity analysis was conducted by increasing the discount rate by 0.5% and reducing earnings by 10% to assess the impact on the recoverable amount as compared to the carrying value of the CGU. The carrying value of goodwill is lower than the reduced recoverable amount in the sensitivity analysis, further confirming no indications of impairment.

#### 13 DUE TO BANKS AND OTHER FINANCIAL INSTITUTIONS

Due to banks and other financial institutions consists of short-term borrowings from banks and other financial institutions.

As at 31 December	202	3	2022		
	BHD millions	USD millions	BHD millions	USD millions	
Term deposits	586.1	1,554.6	392.6	1,041.4	
Current and call accounts	84.9	225.2	79.7	211.4	
	671.0	1,779.8	472.3	1,252.8	

As at 31 December 2023 and 31 December 2022, the Group was a net contributor into the treasury bill and interbank money markets.

#### 14 BORROWINGS UNDER REPURCHASE AGREEMENTS

Borrowings under repurchase agreements amount to BHD 460.7 million (USD 1,222.0 million) [31 December 2022: BHD 244.4 million (USD 648.3 million)] and the fair value of the investment securities pledged as collateral amounts to BHD 503.3 million (USD 1,335.0 million) [31 December 2022: BHD 278.1 million (USD 737.7 million)].

#### 15 CUSTOMER DEPOSITS

As at 31 December	2023	2023		2

#### 18 CONTINGENT LIABILITIES AND BANKING COMMITMENTS

The Group issues commitments to extend credit and guarantees the performance of customers by issuing standby letters of credit and guarantees to third parties. For these instruments, the contractual amount of the financial instrument represents the maximum potential credit risk if the counterparty does not perform according to the terms of the contract. The credit exposure for the contingent liabilities is reduced by obtaining counter guarantees and collateral from third parties. A large majority of these expire without being drawn upon, and as a result, the contractual amounts are not representative of the potential future credit exposure or liquidity requirements of the Group.

Based upon the level of fees currently charged, taking into account maturity and interest rates together with any changes in the credit worthiness of counterparties since origination, the Group has determined that the fair value excess or shortage of contingent liabilities and undrawn loan commitments is not material.

As at 31 December	20:	23	2022	
	BHD millions	USD millions	BHD millions	USD millions
Contingent liabilities				
Liabilities on confirmed documentary credits	66.2	175.6	103.4	274.3

#### 19 DERIVATIVE AND FOREIGN EXCHANGE FINANCIAL INSTRUMENTS

The Group utilises various derivative and foreign exchange financial instruments for trading, asset / liability management and hedging risks. These instruments primarily comprise futures, forwards, swaps and options.

Futures and forward contracts are commitments to buy or sell financial instruments or currencies on a future date at a specified price or yield, and may be settled in cash or through delivery. Swap contracts are commitments to settle in cash on a future date or dates, interest rate commitments or currency amounts based upon differentials between specified financial indices, as applied to a notional principal amount. Option contracts give the acquirer, for a fee, the right but not the obligation, to buy or sell within a limited period a financial instrument or currency at a contracted price.

In respect of the derivative and foreign exchange financial instruments, the contract / notional principal amounts do not represent balances subject to credit or market risk. Contract / notional principal amounts represent the volume of outstanding transactions and are indicators of business activity. These amounts are used to measure changes in the value of derivative products and to determine the cash flows to be exchanged. The replacement cost is the cost of replacing those financial instruments with a positive market value, together with an estimate for the potential future change in the value of the contract, and reflects the maximum credit loss for the Group had all these counterparties defaulted. The fair value represents the aggregate of the positive and negative cash flows which would have occurred if the rights and obligations arising from the instrument were extinguished by the Group in an orderly market as at the reporting date. The fair values of derivative financial instruments such as interest rate swaps and forward rate agreements were calculated using discounted cash flow models based on current market yields for similar types of instruments and the maturity of each instrument. The futures contracts, foreign exchange contracts and interest rate options were revalued using market prices and option valuation models as appropriate.

a) The following table summarises for each type of derivative and foreign exchange financial instrument, the aggregate notional amounts, the replacement cost and the fair value:

In BHD millions	Notional principal amount		Replaceme	ent cost	Fair value	
As at 31 December	2023	2022	2023	2022	2023	2022
Interest rate contracts						
Interest rate swaps	6,354.0	4,114.3	32.1	59.9	16.1	53.4
Foreign exchange contracts						
Outright spot and forward contracts	248.2	264.0	0.1	2.8	-	2.1

#### 20 SHARE CAPITAL

	2023		20	22
	BHD millions	USD millions	BHD millions	USD millions
Authorised share capital				
2,500,000,000 (2022: 2,500,000,000) ordinary shares of 100 fils each	250.0	663.1	250.0	663.1
Issued and fully paid share capital				
At 1 January 2023: 2,060,068,236 ordinary shares of 100 fils each (at 1 January 2022:				
1,872,789,305 shares of 100 fils each)	206.0	546.4	187.3	496.8
Bonus issue (one for ten shares held)	20.6	54.7	18.7	49.6
At 31 December 2023 2,266,075,060 ordinary shares of 100 fils each (at 31				
December 2022: 2,060,068,236 shares of 100 fils each)	226.6	601.1	206.0	546.4

The shareholders annual general ordinary and extra ordinary meetings for the year 2022 held on 22 March 2023 approved the increase of issued and fully paid capital by the issue of bonus shares at the rate of one additional share for every ten shares held and amounted to BHD 20.6 million.

The distribution of ordinary shares, setting out the number of shares and shareholders and percentage of total outstanding shares in the following categories, is shown below:

	31 December 2023			31 December 2022		
	Number of shares	Number of shareholders	% of total outstanding shares	Number of shares	Number of shareholders	% of total outstanding shares
Less than 1%	720,620,214	1,910	31.7%	653,742,126	1,808	31.7%
1% up to less than 5%	301,221,789	7	13.3%	275,205,147	7	13.3%
5% up to less than 10%	-	-	-	-	-	-
10% up to less than 20%	245,870,464	1	10.9%	223,518,605	1	10.9%
20% up to less than 50%	998,362,593	1	44.1%	907,602,358	1	44.1%
	2,266,075,060	1,919	100.0%	2,060,068,236	1,817	100.0%

The distribution of ordinary shares ownership based on nationality of the shareholder is shown below:

	3	31 December 2023			31 December 2022			
	Number of shares	Number of shareholders	% of total outstanding shares	Number of shares	Number of shareholders	% of total outstanding shares		
Bahraini	2,128,625,407	1,734	93.9%	1,939,370,927	1,658	94.1%		
Other GCC countries	133,480,314	134	5.9%	117,207,181	109	5.7%		
Others	3,969,339	51	0.2%	3,490,128	50	0.2%		
	2,266,075,060	1,919	100.0%	2,060,068,236	1,817	100.0%		

44.1% of the Bank's share capital is held by the Bahrain Mumtalakat Holding Co, which is 100% owned by the Government of Bahrain. 10.9% of shares is owned by the Social Insurance Organisation, Kingdom of Bahrain. The rest of the share capital is widely held primarily by the citizens of, and entities incorporated in, the Kingdom of Bahrain.

#### Employee share incentive scheme

The employee share incentive scheme ("Scheme") was approved at the ordinary general meeting on 11 March 2015 in pursuant to CBB's Sound Remuneration Practices regulation. As a result, 19,104,000 ordinary shares amounting to BHD 1.9 million were issued in 2015 to an independent party to hold the beneficial interest of the shares under the scheme. Shares are allocated to the employees under the scheme. The allocated share under the scheme are entitled to cash and stock dividend and subject to malus and clawback provisions of the scheme. As at 31 December 2023, there are 8,685,507 (2022: 10,532,535) shares unallocated. These unallocated shares under the scheme are deducted from equity.

#### 21 RESERVES

#### a) Statutory reserve

In accordance with the Commercial Companies Law, 10 percent of net profit is appropriated to a statutory reserve, which is not normally distributable except in accordance with Article 224 of the law. Such appropriations may cease when the reserve reaches 50 percent of paid up share capital.

#### b) General reserve

The reserve has been created in accordance with the Group's articles of association and underlines the shareholders' commitment to enhance the strong equity base of the Group.

#### 21 RESERVES (continued)

#### c) Fair value reserve

The fair value reserve includes the cumulative net change in fair value of instruments classified as FVOCI. The fair value reserve also includes the Group's share of other comprehensive income of associates.

#### d) Donation and charity reserve

Based on the recommendations of the Board of Directors, upon shareholders' approval, an amount is transferred from the profit for the year to this donation and charity reserve. The reserve represents the amount of donations pending utilisation.

#### e) Share premium

Under the employee share incentive scheme, the Group allocated shares at market rates which resulted in increasing the share premium by BHD 1.3 million (USD 3.4 million) [2022: BHD 0.9 million (USD 2.4 million)]

#### 22 APPROPRIATIONS

The appropriations relating to the year 2022 were approved at the annual general meeting held on 22 March 2023.

#### 28 NET OPEN FOREIGN CURRENCY POSITIONS

As at 31 December	2	023	2022		
	BHD millions	USD millions	BHD millions	USD millions	
US Dollar long position - unhedged	46.9	124.4	126.1	334.5	
UAE Dirhams long position - unhedged	44.9	119.1	31.2	82.8	
Saudi Riyal (short) / long position - unhedged	(18.4)	(48.8)	17.6	46.7	

All of the above currencies have a fixed rate of exchange against the Bahraini Dinar. The Group did not have any significant net open positions as at 31 December 2023 or 31 December 2022.

#### 29 RELATED PARTIES

Certain related parties (major shareholders, directors of the Group and families and companies of which they are principal owners, key management personnel and associates) were customers of the Group in the ordinary course of business. The transactions with these parties were made on an arm's length basis. Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Group. Typically, key management personnel include the Chief Executive Officer and persons directly reporting to this position. Significant balances at the reporting date in regard to related parties and transactions during the year with related parties are as below.

The Group qualifies as a government related entity under the definitions provided in IAS 24 as its significant shareholders are government owned. In addition to the government exposures reported below, in its normal course of business, the Group provides commercial lending, liquidity management and other banking services to, and also avails services from, various semi governmental organisations and government owned companies in the Kingdom of Bahrain.

Other operating expenses	3.5	2.5	3.2	3.5	0.5	0.7	

During the year, no net provision charge [2022: BHD 4.7 million (USD 12.5 million)] had been recorded against outstanding balances with related parties.

Certain transactions were approved by the Board of Directors under Article 189(b) of the Commercial Companies Law in the financial year ended 31 December 2023 where the chairman, directors or managers had a direct or indirect interest in the contracts or transactions.

### 30 ASSETS UNDER MANAGEMENT

Assets administered on behalf of customers to which the Bank does not have legal title are not included in the statement of financial position. At 31 December 2023, assets under administration amounted to BHD 205.2 million (USD 544.3 million) [31 December 2022: BHD 254.1 million (USD 674.0 million)].

Derivatives (replacement cost)	2.8	-	62.5	-	65.3

#### 34 INTEREST RATE RISK

Interest rate risk is measured by the extent to which changes in the market interest rates impact margins, net interest income and the economic value of the Group's equity. Net interest income will be affected as a result of volatility in interest rates to the extent that the re-pricing structure of interest bearing assets differs from that of liabilities. The Group's goal is to achieve stable earnings growth through active management of the assets and liabilities mix while, selectively, positioning itself to benefit from near-term changes in interest rate levels. The Treasurer is primarily responsible for managing the interest rate risk. Reports on overall position and risks are submitted to senior management for review and positions are adjusted if deemed necessary. In addition, GALCO regularly reviews the interest rate sensitivity profile and its impact on earnings.

The Group's asset and liability management process is utilised to manage interest rate risk through the structuring of on-balance sheet and off-balance sheet portfolios. The Group uses various techniques for measuring and managing its exposure to interest rate risk. Duration analysis is used to measure the interest rate sensitivity of the fixed income portfolio. Duration of the portfolio is governed by economic forecasts, expected direction of interest rates and spreads. Modified duration gives the percentage change in value of the portfolio following a 1% change in yield. Interest rate swaps and forward rate agreements are used to manage the interest rate risk. The Group uses interest rate gap analysis to measure the interest rate sensitivity of its annual earnings due to re-pricing mismatches between rate sensitive assets, liabilities and derivative positions.

Assets and liabilities are placed in maturity buckets based on the remaining period to the contractual repricing or maturity dates, whichever is earlier. Customer deposits for which no specific contractual maturity or repricing date exists are placed in ladders based on the Group's judgement concerning their most likely repricing behaviour.

The repricing profile and effective interest rate of the various asset and liability categories are as follows:

Effoctivo

Cumulative interest rate sensitivity gap		1,252.0	1,197.6	874.8	1,448.8	1,884.3		

#### 35 MARKET RISK

a) The Group uses the standardised method for allocating market risk capital.

The following table shows the capital charges as at 31 December:

Risk type	2023	2022
In BHD millions		
Interest rate risk	1.3	1.8
Foreign exchange risk	0.4	-
Total minimum capital required for market risk	1.7	1.8
Multiplier	12.5	12.5
Market risk weighted exposure under the standardised method	21.3	22.5

b) The principal risk to which the Group portfolio is exposed is the risk of loss from fluctuations in future cash flows of financial instruments because of changes in the market interest rates. The interest rate risk management process is supplemented by monitoring the sensitivity of the Group's financial assets and liabilities to an interest rate shock of 200bps increase / decrease. An analysis of the Group's sensitivity to an increase or decrease in market interest rates on the Group's balance sheet (assuming no asymmetrical movement in yield curves and a constant balance sheet position) is as follows:

	202	2023		2
la DUD avilliana	200 bps parallel	200 bps parallel	200 bps parallel	200 bps parallel
In BHD millions	increase	decrease	increase	decrease
At 31 December	3.7	(3.7)	6.7	(6.7)
Average for the year	3.7	(3.7)	6.9	(6.9)
Minimum for the year	1.2	(1.2)	4.7	(4.7)
Maximum for the year	5.2	(5.2)	9.8	(9.8)

c) The Group holds investments in quoted equities as part of investment securities. Equity risk is the potential adverse impact due to movements in individual equity prices or general market movements in stock markets. The Group manages this risk through diversification of investments in terms of geographical distribution and industrial concentration.

Overall non-trading interest rate risk positions are managed by the Treasury division, which uses investment securities, placements with banks, deposits from banks and derivative instruments to manage the overall position arising from the Group's non-trading activities. The use of derivatives to manage interest rate risk is described in note 19.

#### **36 SEGMENT INFORMATION**

For management purposes, the Group is organised into the following main strategic business units (SBUs) - Retail Commercial and SMEs, Corporate Institutional and Investment Banking, Overseas Branches and Treasury Capital Markets and Wealth Management. These SBUs are the basis on which the Group reports its operating segment information.

The consumer banking and business banking related SBUs in Bahrain provide various banking products and services to the Group's customers. The SBUs are differentiated based on their respective customer segments. Retail Commercial and SMEs caters to individuals and commercial enterprises, Corporate Institutional and Investment Banking caters to governments and corporates.

The Treasury, Capital Markets, Wealth Management and Investments SBU has the overall responsibility of managing the Group's liquidity, interest rate, foreign exchange, market risk and investments and the Overseas Branches SBU provide various banking products and services to the Group's customers outside Bahrain.

Financial information about the operating segments is presented in the following table:

In BHD millions	Retail, Commo SMEs	ercial, and	Corporate, Institution	•	Overseas Bran	ches	Treasury, Capita Wealth Manage Investme	ment and	Tota	I
For the year ended 31 December	2023	2022	2023	2022	2023	2022	2023	2022	2023	2022

For the year ended 31 December										
Depreciation and amortisation for the year	(6.1)	(4.3)	(1.0)	(1.1)	(1.5)	(0.9)	(1.1)	(1.6)	(9.7)	(7.9)
Provision for impaired assets	(5.4)	13.8	(1.0)	2.9	(1.2)	0.9	(0.1)	(0.2)	(7.7)	17.4

Segment revenues and expenses are directly attributable to the business segments. The benefit of the Group's capital has been distributed across the segments in proportion to their total assets employed. Expenses of departments whose services are jointly utilised by more than one segment have been allocated to the relevant segments on an appropriate basis.

Inter-segment interest income and expense represent the interest cost on the excess funds which are transferred by all the other business segments to Treasury, Capital Markets & Wealth Management.

#### b) LIQUIDITY RISK

The table below shows the undiscounted cash flows of the Group's financial liabilities and undrawn loan commitments on the basis of their earliest contractual liability. The Group's expected cash flows on these instruments vary significantly from this analysis; for example customers are expected to maintain stable or increased balances in demand deposits and not all undrawn loan commitments are expected to be drawn down immediately. For derivatives that have simultaneous gross settlement (e.g. forward exchange contracts and currency swaps) the gross nominal undiscounted cash inflow/(outflow) are considered while in the case of derivatives that are net settled the net amounts have been considered.

In BHD millions As 31 December 2023 Non derivative liabilities	Carrying amount	Gross nominal inflow / (outflow)	Less than 3 months	3 to 6 months	6 to 12 months	1 to 5 years	More than 5 years

The Group's consolidated net stable funding ratio (NSFR) as at 31 December 2023 was 137% (31 December 2022: 139%), while the average LCR for the fourth quarter of the year stood at 288% (31 December 2022: 398%). The Group continues to meet minimum required regulatory liquidity ratios and is also in compliance with the minimum required capital adequacy ratio ("CAR"). Further details on NSFR are disclosed in note 38.

### 38 NET STABLE FUNDING RATIO

The main objective of the NSFR is to promote resilience in the banking system by improving the funding profile of banks by ensuring sufficient level of stable funding in relation to assets and commitments. The NSFR thus promotes banks to rely on funding from stable sources and long-term borrowing in order to reduce the risks of disruptions which might impact the bank's liquidity position. Banks are required to meet a minimum NSFR of 100% on a continuous basis.

The main drivers behind the Group's strong available stable funding (ASF) are the healthy capital base (19% of the Group's ASF), large deposits portfolio with strong contributions from the retail and small business sectors (62% of the Group's ASF) and the sizable corporate and sovereign deposits (19% of the Group's ASF).

The majority of the Group's investment security portfolio is classified as high-quality liquid assets (HQLA). The Group's HQLA securities accounted for 28% of the Group's required stable funding (RSF) before applying the relevant weights. Lending provided to financial institutions in the form of loans or placements was predominantly short-term in nature, which required a lower level of required funding, with 85% of total lending provided to financial institutions being in the less than 6 months maturity bucket.

The NSFR ratio of 137% at 31 December 2023 is 2% lower when compared with the 31 December 2022 ratio at 139%. The total ASF was in line with last year's total while marginal increases across several asset lines resulted in a small increase in total RSF.

Further details on the calculation of the NSFR is presented in the following tables.

### 39 RETIREMENT BENEFIT COSTS

The Group's obligations to defined contribution pension plans for employees who are covered by the social insurance pension scheme in Bahrain and its overseas branches are recognised as an expense in the statement of profit or loss. The Group's contribution for 2023 amounted to BHD 3.2 million (USD 8.5 million) [2022: BHD 2.5 million (USD 6.6 million)].

Other employees are entitled to leaving indemnities payable in accordance with the employment agreements or under the respective labour laws. The movement in the provision for leaving indemnities during the year was as follows:

Provision for leaving indemnities				
Movements during the year	2	.023	20	022

Total liabilities		4,209.4		4,209.4

# b) Fair value hierarchy

The Group measures fair values of financial instruments using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements.

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly observable from market data.

Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes input not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation.

All financial instruments other than those disclosed in the table below are classified as level 2.

- (i) Loans and advances: The fair value of floating rate loans which have been disbursed at market rates approximate carrying value. The fair value of fixed rate loans, estimated by discounting future cash flows expected to be received and taking into account expected credit losses based on historical trends, also approximated the carrying value.
- (ii) Customer deposits: The estimated fair value of deposits with no stated maturity, which includes non-interest bearing deposits, is deemed to equal the amount repayable on demand, which is represented by the carrying value of the deposits. For interest bearing fixed maturity deposits, the Group estimates that fair value will approximate their book value as the majority of deposits are of short term nature and all deposits are at market rates.
- (iii) Other financial assets and liabilities: The fair value is considered to approximate their book values due to their short term nature and negligible probability of credit losses.

#### 42 ACCOUNTING CLASSIFICATION (continued)

### b) Fair value hierarchy (continued)

The table below analyses financial assets and liabilities carried at fair value, by valuation method.

In BHD millions	2023				2022			
At 31 December	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Fair value through profit or loss:								
Equity instruments / managed funds	-	3.6	-	3.6	-	3.9	-	3.9
Debt instruments	0.2	17.1	-	17.3	-	13.3	-	13.3
Loans and advances	-	-	2.1	2.1	-	-	2.5	2.5
Other assets - investment properties	-	18.5	-	18.5	-	13.7	-	13.7
Fair value through other comprehensive income:								
Debt instruments	264.5	73.7	-	338.2	269.2	60.6	-	329.8
Equity instruments	51.5	-	33.7	85.2	55.8	-	36.6	92.4
Derivative financial assets	-	33.5	-	33.5	-	65.3	-	65.3
Total	316.2	146.4	35.8	498.4	325.0	156.8	39.1	520.9
Derivative financial liabilities		16.3	-	16.3	-	9.8	-	9.8

The following table analyses the movement in level 3 financial assets during the year. There were no transfers between level 1, level 2 and level 3 of the fair value hierarchy.

	Investment sec	Loans and advances		
In BHD millions	2023	2022	2023	2022
At 1 January	36.6	31.0	2.5	-
Acquisition of assets	-	6.1	-	2.5
Total losses in profit or loss	-	-	(0.4)	-
Total losses in other comprehensive income	(2.9)	(0.5)	-	-
At 31 December	33.7	36.6	2.1	2.5

Total loss for the year included in the statement of profit or loss for assets / liabilities classified as level 3 at 31 December 2023 is BHD 0.4 million (USD 1.1 million) [2022: nil].

Level 3 comprises unquoted equity investments classified as fair value through other comprehensive income and loans and advances classified as fair value through profit or loss which are measured at their estimated fair value based on the latest financial information by the investee. Sensitivity analysis of the movement in fair value of the financial instruments in the level 3 category financial assets is assessed as not significant to the other comprehensive income and total equity.

# 44 SHARIAH-COMPLIANT FACILITIES

The Group offers various shariah-compliant facilities through approved products at the Bank or through BISB, the Islamic retail banking subsidiary. The activities of each bank are supervised by their respective Shariah Supervisory Board.

The Group does not commingle funds raised from shariah-compliant products and does not use shariah-compliant sources of funding to finance its non shariah-compliant assets.

The Group's shariah-compliant assets and liabilities are as follows:

As at 31 December	2023		2022	
	BHD millions	USD millions	BHD millions	USD millions
Assets				
Cash and balances at central banks	55.6	147.5	57.2	151.7

Other impairment and provisions, net	(1.0)	(2.7)	(0.7)	(1.7)
Profit for the year	11.6	30.8	13.7	36.3

The Group follows IFRS for accounting and measurement of all its financial assets and liabilities and for any resulting income and expenses. Note 2 of the consolidated financial statements outlines the details of the Group's accounting policies.

### Revenue recognition and measurement for shariah-compliant financing assets

Shariah-compliant financing assets are classified under loans and advances in the consolidated financial statements and are carried at amortised cost less impairment allowances. Profit from shariah-compliant financing contracts are recognised in the income statement as it accrues, taking into account the effective yield of the asset or an applicable floating rate.

#### Unrestricted investment accounts

Unrestricted investment accounts are classified under deposits from customers in the consolidated financial statements and are carried at amortised cost. Finance expense on such accounts are recognised in the income statement as it accrues, taking into account the effective yield of the liability or an applicable floating rate.

The Group charges management fee (mudarib fees) to unrestricted investment account holders. The income attributable to customers from the total unrestricted investment accounts income is allocated to the investment accounts after setting aside provisions and deducting the Group's share of income. The allocation of income is determined by the management of the Group within the allowed profit sharing limits as per the terms and conditions of the unrestricted investment accounts. Administrative expenses incurred in connection with the management of the funds are borne directly by the Group and are not charged separately to investment accounts.

# Conflicts with the requirements of the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI)

The Group's accounting and measurement policies differ from the requirements of AAOIFI in the following areas:

- In respect of income recognition from mudaraba and musharaka contracts, AAOIFI allows for recognition of income only on the basis of declaration and distribution of profits from the underlying contracts. However, as per the Group's current policies, income is recognised on an accrual basis taking into account the effective yield of the asset.
- In respect of finance lease contracts (ijarah muntahia bittamleek), AAOIFI standards require the Group to recognise the asset under lease on its books and depreciate it over the lease term. However, as per the Group's current policies, the amount financed is recognised as a loan and the income is recognised over the lease term on an accrual basis taking into account the effective yield of the asset. This accounting policy variation has no impact on the Group's consolidated statement of profit or loss.
- In respect of murabaha receivables (fixed profit products), AAOIFI requires recognition of receivables assets at its face value (i.e. the gross amount) and requires deferred profits to be netted against the receivable balance for the purpose of presentation in the consolidated financial statements. As per the Group's current policies, the amount receivable is recognised at its amortised cost (i.e. profits are recognised only on an accrual basis). However, the net amount of murabaha receivables for the purposes of the financial statements remains to be the same under both IFRS and AAOIFI.
- Funds raised from unrestricted investment account holders are required to be shown as a separate category between equity and liabilities. However, as the Group complies with IFRS, the funds raised from unrestricted investment account holders are disclosed under liabilities.
- In respect of investment properties, AAOIFI standards require the Group to recognise the changes in fair value (only gains) in the fair value reserve and losses to be adjusted against the fair value reserve to the extent of the available balance, with the remaining losses recognised in the consolidated statement of profit or loss. However, as per the Group's current policies, changes in the fair value of the investment properties subsequent to initial recognition are recorded in the consolidated statement of profit or loss. This has not resulted in any impact on the Group's consolidated statement of profit or loss during the year.

### **45 CAPITAL ADEQUACY**

The Group operates as an independent banking institution with headquarters in Bahrain, subsidiary and branches in Bahrain, United Arab Emirates and Saudi Arabia.

The capital adequacy ratio has been calculated in accordance with Basel III and Central Bank of Bahrain guidelines incorporating credit risk, operational risk and market risk. The Group uses the standardised approach for computing credit risk. Operational risk is computed using the basic indicator approach. Market risk is computed using the standardised method.

The details of the Group's capital adequacy calculations are shown below:

As at 31 December	2023		2022		
	BHD millions	<b>USD</b> millions	BHD millions	USD millions	
Common equity (CET1)	540.1	1,432.6	544.2	1,443.5	
Additional tier 1	-	-	-	-	
Total common equity tier 1 (CET)	540.1	1,432.6	544.2	1,443.5	
Tier 2	26.4	70.0	26.5	70.3	
Total capital base	566.5	1,502.6	570.7	1,513.8	
Risk weighted exposure:					
Credit risk	2,114.9	5,609.8	2,122.8	5,630.8	
Market risk	21.3	56.5	22.5	59.7	
Operational risk	295.3	783.3	276.4	733.1	
Total risk weighted exposure	2,431.5	6,449.6	2,421.7	6,423.6	
CET 1 ratio	22.2%		22.5%		
Total capital adequacy ratio	23.3%		23.6%		

Conventional banks are required to maintain a minimum total capital adequacy ratio of 12.5%. Additionally, according to Central Bank of Bahrain rulebook, banks designated as domestic systemically important banks (DSIBs) must hold designated HLA (high loss absorbency) expressed as common equity tier 1 capital at 1.5% of the total risk weighted assets, as calculated for the purposes of capital adequacy.

## **46 DEPOSIT PROTECTION SCHEME**

Deposits held with the Group's Bahrain operations are covered by the regulation protecting deposits and unrestricted investment accounts issued by the Central Bank of Bahrain in accordance with Resolution No (34) of 2010. The scheme applies to all eligible accounts held with Bahrain offices of the Group subject to specific exclusions, maximum total amount entitled and other regulations concerning the establishment of a Deposit Protection Scheme and a Deposit Protection Board.

# **47 SUBSEQUENT EVENT**

The Group has initiated discussions with the Bank of Bahrain and Kuwait B.S.C. about a potential merger and would be appointing advisers to conduct the economic feasibility study of the merger. The discussions are at initial stage and an estimate of the financial effect of the potential transaction cannot be made reliably.

# **48 COMPARATIVES**

Certain comparatives have been restated where necessary to conform to the current year's presentation. The restatement did not affect previously reported profit or total equity of the Group.
